6 To Tie Your Hunting Tie

Basic ingredients:

One clean, well pressed hunting tie (four fold or shaped)

One shirt preferably collarless with neck button or stud

Supply of safety pins and one hunting tie-pin

One pair of clean hands

- 6.1 Most Hunting Ties have a button hole in the front to fix to the neck button or stud. (If not, a concealed pin helps hold the tie in place.)
With the centre of the tie at the front of the neck, either (a) cross over your four fold tie at the back, or (b) push the opposite end of your shaped tie through the slot at the back.
- 6.2 In both cases then make a single right-over-left knot, pulling it close to the neck. (Some people use a pin here to secure the knot.) At this stage, it is worth ensuring that the tie is lying neatly round your neck and that the knot is central.
- 6.3 Now make a second knot by passing the tie left over right.
- 6.4 To finish your FOUR FOLD tie, pull the left end up high, opening out the fold and placing a hidden pin to hold the peak of the tie high above the knot. Allow the tie to fall straight over the knot and secure both ends, but not so tightly that they pull the tie downwards. The tie-pin can then be inserted horizontally to secure the tie to the knot.
- 6.5. To finish your SHAPED tie, pull both ends out towards your ears and allow to fall crossing over the knot, the top of which should just be visible. Secure both ends to maintain the shape, but again not too tightly, and insert your tie-pin horizontally to secure the tie to the knot.
